Immigration and Naturalization Service

OFFICE OF ADMINISTRATIVE APPEALS 425 Eye Street N.W. ULLB, 3rd Floor Washington, D.C. 20536

File:

EAC 97 163 51356

Office: California Service Center

Date:

OCT 2 4 2000

IN RE: Petitioner:

Beneficiary:

Petition:

Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the Immigration and

Nationality Act, 8 U.S.C. 1101(a)(15)(H)(i)(b)

Pinc Colv

IN BEHALF OF PETITIONER:

Identifying dues assessed to prevent clearly unwarranted invacion of personal privacy

## **INSTRUCTIONS:**

This is the decision in your case. All documents have been returned to the office which originally decided your case. Any further inquiry must be made to that office.

If you believe the law was inappropriately applied or the analysis used in reaching the decision was inconsistent with the information provided or with precedent decisions, you may file a motion to reconsider. Such a motion must state the reasons for reconsideration and be supported by any pertinent precedent decisions. Any motion to reconsider must be filed within 30 days of the decision that the motion seeks to reconsider, as required under 8 C.F.R. 103.5(a)(1)(i).

If you have new or additional information which you wish to have considered, you may file a motion to reopen. Such a motion must state the new facts to be proved at the reopened proceeding and be supported by affidavits or other documentary evidence. Any motion to reopen must be filed within 30 days of the decision that the motion seeks to reopen, except that failure to file before this period expires may be excused in the discretion of the Service where it is demonstrated that the delay was reasonable and beyond the control of the applicant or petitioner. Id.

Any motion must be filed with the office which originally decided your case along with a fee of \$110 as required under 8 C.F.R. 103.7.

FOR THE ASSOCIATE COMMISSIONER.

rrance M. O'Reilly, Director Administrative Appeals Office

DISCUSSION: The nonimmigrant visa petition was denied by the director. A subsequent appeal was dismissed by the Associate Commissioner for Examinations. The matter is now before the Associate Commissioner on a motion to reopen. The motion will be granted and the previous decisions of the director and the Associate Commissioner will be affirmed.

The petitioner is a wholesale, import and export firm with four employees and asserted gross annual income of \$281,487. It seeks to employ the beneficiary as a cell repairer for a period of three years. The director determined the petitioner had not established that the proffered position is a specialty occupation. The Associate Commissioner concurred in this determination.

On motion, counsel reiterates his argument that the proffered position is a specialty occupation.

Section 101(a) (15) (H) (i) (b) of the Immigration and Nationality Act (the Act), 8 U.S.C. 1101(a) (15) (H) (i) (b), provides in part for nonimmigrant classification to qualified aliens who are coming temporarily to the United States to perform services in a specialty occupation. Section 214(i)(1) of the Act, 8 U.S.C. 1184(i)(1), defines a "specialty occupation" as an occupation that requires theoretical and practical application of a body of highly specialized knowledge, and attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

Pursuant to section 214(i)(2) of the Act, 8 U.S.C. 1184(i)(2), to qualify as an alien coming to perform services in a specialty occupation the beneficiary must hold full state licensure to practice in the occupation, if such licensure is required to practice in the occupation. In addition, the beneficiary must have completed the degree required for the occupation, or have experience in the specialty equivalent to the completion of such degree and recognition of expertise in the specialty through progressively responsible positions relating to the specialty.

Pursuant to 8 C.F.R. 214.2(h)(4)(iii)(B), the petitioner shall submit the following with an H-1B petition involving a specialty occupation:

- 1. A certification from the Secretary of Labor that the petitioner has filed a labor condition application with the Secretary,
- 2. A statement that it will comply with the terms of the labor condition application for the duration of the alien's authorized period of stay, and

3. Evidence that the alien qualifies to perform services in the specialty occupation.

The petitioner has provided a certified labor condition application and a statement that it will comply with the terms of the labor condition application.

Pursuant to 8 C.F.R. 214.2(h)(4)(iii)(C), to qualify to perform services in a specialty occupation, the alien must meet one of the following criteria:

- 1. Hold a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
- 2. Hold a foreign degree determined to be equivalent to a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
- 3. Hold an unrestricted State license, registration, or certification which authorizes him or her to fully practice the specialty occupation and be immediately engaged in that specialty in the state of intended employment; or
- 4. Have education, specialized training, and/or progressively responsible experience that is equivalent to completion of a United States baccalaureate or higher degree in the specialty occupation and have recognition of expertise in the specialty through progressively responsible positions directly related to the specialty.

The beneficiary holds a baccalaureate degree in electrical engineering conferred by an institution in the Philippines. Accordingly, it is concluded that the petitioner has shown that the beneficiary qualifies to perform the duties of the proffered position.

The term "specialty occupation" is defined at 8 C.F.R. 214.2(h)(4)(ii) as:

an occupation which requires theoretical and practical application of a body of highly specialized knowledge in fields of human endeavor including, but not limited to, architecture, engineering, mathematics, physical sciences, social sciences, medicine health. and education, business specialties, accounting, theology, and the arts, and which requires the attainment of a bachelor's degree or higher in a specific specialty,

or its equivalent, as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- 1. A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- 2. The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- 3. The employer normally requires a degree or its equivalent for the position; or
- 4. The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

The duties of the proffered position are described in pertinent part as follows:

Repairs of multiple-cell dry batteries. Inspects batteries for defects such as dented cans, damaged carbon rods and terminals, and defective sealing. Repairs or replaces defective parts using hand tools. Tests cells and batteries for capacity using voltmeter. Cuts wires to remove faulty cells using hand shears.

The petitioner has added the following on motion:

To apply engineering principles to design, modify and develop cellular phone accessories using software, analyzes test data, and reports to determine if the cellular product meets functional and performance specifications. Study engineering and technical publications to keep abreast of technological changes and developments in cellular industry. He also designs electrical circuits, electronic components and integrated systems ...

The petitioner has not explained why the foregoing was not part of the position description which was initially presented. In addition, the description is vague and provides little insight into the beneficiary's actual day-to-day duties. The petitioner has not indicated the amount of time to be spent in performing the various duties of the position.

The petitioner has failed to establish that any of the four factors enumerated above are present in this proceeding. The petitioner has not shown that it has, in the past, <u>required</u> the services of individuals with baccalaureate or higher degrees <u>in a specialized area</u> for the proffered position. In addition, the petitioner has not shown that similar firms <u>require</u> the services of such individuals in parallel positions.

In these proceedings, the duties of the position are dispositive and not the job title. The proffered position appears to combine the duties of an engineering technician with those of an electrician. The department of Labor's Occupational Outlook Handbook (Handbook), 2000-2001 edition, at page 97 finds no requirement of a baccalaureate or higher degree in a specialized area for employment as an engineering technician. Training is available at technical institutes, junior and community colleges, extension divisions of colleges and universities, public and private vocational-technical schools, and through the armed forces. Such training usually lasts two years.

The <u>Handbook</u> at page 423 also finds no requirement of a baccalaureate degree <u>in a specialized area</u> for employment as an electrician. The best way to learn the electrical trade is by completing an apprenticeship. Some individuals learn the trade through a combination of on-the-job training and trade school or correspondence courses. In view of the foregoing, it is concluded that the petitioner has not demonstrated that the proffered position is a specialty occupation within the meaning of regulations.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. 1361. The petitioner has not sustained that burden. Accordingly, the decision of the director will not be disturbed.

ORDER: The appeal is dismissed.
